Agile test strategy supports DevOps and continuous testing. And continuous testing is important to improving product quality. In Agile development, testing needs to happen early and often. So, instead of waiting for development to be finished before testing begins, testing happens continuously as features are added.

Agile Testing: A Practical
Guide For Testers And Agile
Teams

AGILE TESTING is a testing
practice that follows the
rules and principles of

Agile software development. Unlike the Waterfall method, Agile Testing can begin at the start of the project with continuous integration between development and testing.

What is Agile Testing? Methodology, Process & Life Cycle

Agile testing is a software testing process that follows the principles of agile software development. Agile testing methodology aligns with iterative development methodology in which requirements develop gradually from customers and testing teams. The development is aligned with

Agile Testing Methodology - Methods, Principles ...

Agile testing is a continuous process that's integral to Lean and Built-In Quality. Agile Teams and Agile Release Trains (ARTs) can't go fast without high quality and they surely can't implement a Continuous Delivery Pipeline and achieve Release on Demand without continuous, and mostly automated testing.

Advanced Topic - Agile Testing - Scaled Agile Framework

Agile testers act on the aphorism that simplicity is

the ultimate sophistication. For testing, that means performing only those tests that are necessary, and all tests that are necessary. For the product, that means delivering the simplest possible product that delivers the most possible value.

Best Practices for Agile Testing

Teams that move to agile often wrestle with how to incorporate testing time at the speed of agile. This is a legitimate challenge, because traditional testing methodologies simply don't fit into an agile context. The pace of development requires a new approach to ensuring quality in each build. At Atlassian, the way we test is agile.

Another evolution in agile testing is that testers are no longer a separate organizational unit (there is no "QA department"). Testers are now part of the agile development team.
