A Student's Book and Online Workbook is also available, separately.

This booklet, included at the end of the book, is a useful and practical tool to reinforce the contents of the book through the additional exercising of the main topics and abilities of each block. Now, with a new educational model (2017) which pillars are to learn to learn and to know, learning to be, learning to live together and learning how to make, the book highlights the social and personal development of students, with special emphasis on the development of socio-emotional skills. Redesigned well known sections as Learning Situations, Activity Sequences, Exercises; and totally new ones like: Skills, Attitudes, and Expected learning outcomes, Transversal Skills Development (social consciousness, environmental care, reading, health education), Diagnostic, summative, selfassessment, and coevaluation instruments, etc.BLOCK 1: Conditions and Results. BLOCK 2: Unreal Situations. BLOCK 3: Life experiences.BLOCK 4: Likes and dislikes.

This book bridges the gap between books on probability theory and statistics by providing the probabilistic concepts estimated and tested in the analysis of variance, regression analysis, factor analysis, structural equation modeling, hierarchical linear models, and analysis of qualitative data. The authors emphasize the theory of conditional expectations that is also fundamental to conditional independence and conditional distributions. Key features: Presents a rigorous and detailed mathematical treatment of probability theory, focusing on concepts that are fundamental to understand what we are estimating in applied statistics Explores the basics of random variables along with extensive coverage of measurable functions and integration. Extensively treats conditional expectations with respect to a conditional probability measure and the concept of conditional effect functions, which are crucial in the analysis of causal effects. Is illustrated throughout with simple examples, numerous exercises, and detailed solutions. Provides website links to further resources, including videos of courses delivered by the authors as well as R code exercises to help illustrate the theory presented throughout the book. Aimed at mathematicians, applied statisticians and substantive researchers, this book will help readers to understand in terms of probability theory what applied statisticians and substantive researchers estimate and test in their empirical studies.

A highly focused Cambridge English: First (FCE) course providing efficient exam preparation in 50-60 core hours. Compact First provides B2-level students with thorough preparation and practice needed for exam success. Each unit tackles a key part of each exam paper and includes a section on Grammar for Use of English. The Teacher's Book includes step-by-step guidance for presenting and teaching all the material in the Student's Book along with suggestions for alternative approaches and extension activities. It provides complete answer keys with recording scripts for both the Student's Book and Workbook. The keys include sample and model answers for Writing tasks. There are photocopiable Progress Tests to assess students every two units.

This flexible course brings together all the tools and technology you expect to get the results you need. Whether teaching general English or focusing on exams, Prepare! leaves you and your students genuinely ready for what comes next: real Cambridge English exams, or real life. The Level 6 Student's Book engages students and builds vocabulary range with motivating, age-appropriate topics. Its unique approach is driven by cutting-edge language research from English Profile and the Cambridge Learner Corpus. 'Prepare to...' sections develop writing and speaking skills. A Student's Book and Online Workbook is also available, separately.

Challenge and inspire your teenage learners to think beyond language. Think is a vibrant course designed to engage teenage learners and make them think. As well as building students' language skills, it offers a holistic approach to learning: developing their thinking skills, encouraging them to reflect on values and building their self-confidence. Topics are chosen to appeal to and challenge teenagers, firing their imagination and ensuring effective learning. Exam-style exercises and tips help students prepare for Cambridge English Key, Preliminary, First and Advanced. Informed by the Cambridge English Corpus, the course reflects real language usage and 'Get it right' sections help students avoid common mistakes.

Challenge and inspire your teenage learners to think beyond language. Think is a fresh, vibrant and upbeat course designed to engage teenage learners and make them think. As well as building students' language skills, it offers a holistic approach to learning: developing their thinking skills, encouraging them to reflect on values and building self-confidence. Topics are chosen to appeal to and challenge teenagers, firing their imagination and ensuring effective learning. This split combo edition includes 4 Students' Book and Workbook units combined plus access to the online learning management platform with extra resources interactive activities. Teachers can use the platform to track students' progress and ensure more effective learning.

This is 'the' teacher training course for teachers and trainee teachers preparing for the Cambridge ESOL TKT 'Knowledge About Language' (KAL) Module. The TKT Course KAL Module is a comprehensive self-study course with a complete KAL Practice Test and full answer key, making it perfect for all candidates preparing for TKT KAL on their own or with the support of a tutor. It contains 18 units that cover the four parts of the KAL test - Lexis, Phonology, Grammar and Discourse. These units introduce readers to the concepts and terms related to the English language that are important for teachers and for the test.
